Brown, oval, slightly convex, film coated tablets in PVC/aluminum blisters. Each box contains 30 tablets presented in 10 tablets per blister together with a patient information leaflet.

Pharmacodynamics

Venotonic and vascular protector.

- Pharmacology

It is active upon the return vascular system in the following way :

- it reduces venous distensibility and stasis,
- in the microcirculation, it normalises capillary permeability and increases capillary resistance.

- Clinical Pharmacology

Double blind controlled studies using methods by which the effects of the product on venous haemodynamics could be demonstrated and quantified have confirmed the above pharmacological properties in man.

- Clinical trials

Double-blind placebo-controlled trials have demonstrated the activity of the drug in phlebology, in the treatment of chronic venous insufficiency of the lower limbs (both function and organic).

Pharmacokinetics

In man, following oral administration of the substance containing Euvein 500 :

- excretion is mainly faecal, a mean of 14% of the dose administered is excreted in the urine.
- the elimination half-life is 11 hours.
- the drug extensively metabolised as evidenced by the presence of various phenol acids in the urine.

Indication

- **Euvein 500 Film Coated Tablet** is a phlebotonic that increases the venous tone and protects the vessels.

- Treatment of symptoms related to venolymphatic insufficiency (heavy legs, pain, early morning restless legs).
- Treatment of functional symptoms related to acute hemorrhoidal attacks.

Dosage

Usual dose in chronic conditions : 2 tablets daily in two divided doses, morning and evening at mealtimes.

In acute hemorrhoidal attacks :

6 tablets daily (in 3 divided doses) for 3 to 4 days, then 4 tablets daily (in 2 divided doses)

Route of Administration : Oral

Precaution

If symptom of acute hemorrhoidal attack do not improve or worsen within 2 weeks, please consult your doctor.

Euvein 500 Film Coated Tablet

should not be administered during the first three months of pregnancy.
