

THELMIN TABLET

VITHE01-var2

Description

Round, brownish yellow film-coated tablet, bevel-edged, shallow convex faces, "HD" embossed and scored on the same face.

Composition

Pyrantel Pamoate equivalent to 125 mg of Pyrantel/tablet.

Actions and Pharmacology

Pyrantel pamoate is an anthelmintic effective against roundworms, threadworms and hookworms. It paralyses the worms which are then dislodged by peristaltic activity.

It is poorly absorbed orally and is excreted in the urine and faeces.

Indications

For treatment of single or mixed infestations of roundworm, threadworm and hookworm.

Contraindications

- It should be avoided in pregnant women, wherever possible.
- Not recommended for children less than 1 year of age.

Precautions

- Caution in patients with impaired liver function.
- The anthelmintic effect of pyrantel may be antagonised by piperazine.

Main Side/Adverse Effects

Nausea, vomiting, gastrointestinal discomfort and diarrhoea.

Overdosage

Clinical features : Nausea, vomiting, headache, dizziness.

Treat overdosage by symptomatic measures.

Note : These effects do not persist and are usually not severe enough to require treatment.

Dosage and Administration

Adults and Children:

Oral, the equivalent of 10 mg of pyrantel per kg body weight, as a single dose. Maximum 1g.

Note : For hookworm infection, the dose may be given on 3 consecutive days, up to 20 mg per kg may be given as a single dose and repeated daily for 1 or 2 days, if necessary.

Note : The information given here is limited. For further information, consult your doctor or pharmacist.

Storage : Store below 30°C. Protect from light and moisture.
Presentation/Packing : Film-coated tablet 125 mg x 30's, 100's, 500's, 1000's. *(Not all presentations available locally)*
