

Egoderm Cream

Description:

Pale fawn cream

Active Ingredients:

Ichthammol (tumenol ammonium) 1% w/w

Action:

Pharmacodynamics
Egoderm Cream contains 1% w/w ichthammol (tumenol ammonium). The mode of action of ichthammol has not been elucidated, however, it has been in widespread use for many years and is used for the symptomatic relief of pruritis and inflammation. Ichthammol is mild, soothing and non-irritant, It has been available for many decades and an extensive literature review confirms the absence of serious adverse reactions. Sensitivity to ichthammol has been reported but considering it's exhaustive use over many years, the incidence is insignificant.
Pharmacokinetics
As there is no clearly defined dose or effective concentration, the pharmacokinetics for this product is not relevant.

Indications:

Relieves irritation and symptoms of dry, red skin and dermatitis; facial, cosmetic or shaving rashes; hand rashes and cracked fissured skin.

For the relief of symptoms of eczema and persistent infantile eczema. Maintenance therapy for dry, scaly conditions.

Directions:

Apply to affected area 3 times daily or as needed. When condition clears, continue using Egoderm Cream less frequently for complete recovery of underlying skin.

Mode of Administration:

Topical

Contraindications:

Known sensitivity to any of the ingredients.

Warning and Precautions:

For external use only.

Interactions With Other Medicaments:

No interactions known.

Pregnancy and Lactation:

No deleterious effects expected. Ichthammol has been widely used for many years and no adverse effects have been reported in published literature.

Side Effects:

Allergy to any ingredients may cause skin irritation.

Symptoms and Treatment of Overdose:

Not applicable (topical preparation)

Storage Condition:

Store below 30°C.

Paok Sizes Available:

25g tube
