

EgoPsoryl TA

Description:

EgoPsoryl TA is a mustard yellow brown gel.

Active Ingredients:

Coal tar 5% w/w, phenol 0.5% w/w, sulfur 0.5% w/w in an alcohol gel base.

Action:

Pharmacodynamics

Coal tar has anti-pruritic, anti-inflammatory, keratoplastic and antiinfective actions. They are used in the treatment of eczema, psoriasis, dandruff and seborrhoeic dermatitis. Tars have been used in the treatment of skin diseases for over 2000 years. The action of wood tars (pine tar) is less marked than that of coal tars. The chief use of coal tar preparations however, lies in their keratoplastic and anti-pruritic activity in atopic dermatitis, chronic eczema and in psoriasis. Coal tar unlike wood tars has a photosensitizing action and ultraviolet light (UVB) increases the efficacy of coal tar in the treatment of psoriasis.

Coal tar is obtained from destructive distillation of bituminous coal at temperatures in the range of 900-1100°C. Coal tar is a complex and variable mixture of as many as 10000 compounds and contains numerous polycyclic aromatic hydrocarbons.

Phenol is an antiseptic and disinfectant active against a wide range of micro-organisms. It has been used to disinfect skin and relieve itching.

Sulfur – precipitated is a keratolytic agent which helps to remove scales and is a mild antiseptic. It has been widely employed in the treatment of seborrhoeic conditions.

Pharmacokinetics

As there is no clearly defined dose or effective concentration, the pharmacokinetics for this product is not relevant.

Indications:

General psoriasis, psoriasis of the scalp and chronic dermatitis. An aid in the control of stable, moderate psoriasis and persistent dermatitis.

Recommended dosage:

Apply to affected skin 2-4 times daily. Avoid soap as soap may irritate the skin. Cleanse with Pinetarsol, anti-itch cleansing treatment, which helps reduce inflammation and remove scales. For enhanced effect, apply petroleum jelly over EgoPsoryl TA.

Scalp: Apply at night and if desired, leave on during the day. Cleanse with Sebitar when needed.

Sensitive skin (e.g. face, children): Use Egoderm Cream for first 7 days. Apply EgoPsoryl TA over Egoderm Cream for 3 days. Then use EgoPsoryl TA alone.

Mode of administration:

Topical.

Contraindications:

Known sensitivity to any of the ingredients.

Warnings and precautions:

For external use only. Avoid eyes. Do not swallow. Keep out of reach of children. If irritation occurs, discontinue use. Do not use for prolonged periods without consulting a medical practitioner. Do not use with other forms of therapy such as ultra-violet radiation or prescription drugs unless directed by a medical practitioner. Not to be used under occlusion except on medical advice. Not recommended for use on children under 2 years of age except under the direction and supervision of a doctor.

Interactions with Other Medicaments (drug interactions):

No interactions known.

Pregnancy and lactation:

Not recommended for use during pregnancy or while breastfeeding. Please consult your healthcare professional before use.

Side effects:

Allergy to any of the ingredients may cause skin irritation.

Overdose:

Not applicable (topical preparation).

Storage:

Store below 30°C

Pack available:

30g tube

Note:

This information is limited. For further information please consult your doctor or pharmacist.
