

PRITARAX LOTION 10%

White colour, rose fragrance lotion

Contents:

Crotamiton	10% w/v
Chlorocresol	0.1% w/v

Indications:

For treatment of scabies and relief of pruritus associated with various dermatoses.

Pharmacology:

Crotamiton, a scabicial and antipruritic agent, is highly effective in eradicating scabies infestations and relief of pruritus ani, vulvae, and scroti, senile pruritus, and pruritus associated with various dermatoses.

One application is usually effective for 6 to 10 hours.

Adverse Effects:

Allergic sensitivity or primary irritation reactions may occur in some patients.

Precautions:

- Avoid contact with the eyes and mucous membranes.
- Check with physician if condition does not improve or if it becomes worse.
- Treatment with crotamiton should be discontinued if severe irritation or sensitization develops.
- Safety for use in pregnancy and lactation has not been established.

Contraindications:

- Avoid in patients who are hypersensitive to crotamiton.
- It should not be used in the presence of acute exudative or varicellar dermatitis.

Dosage and Administrations:

For pruritus - Topical, to the skin. Repeat as needed.

For scabies - Topical, to the skin, as a 10% lotion for two applications at 24-hour intervals. (Do not wash off the first coat of medication)

The lotion should be rubbed well and enough to cover the entire skin surface from the chin down, especially to body folds and creases. A cleansing bath should be taken 48 hours after the second application. Patient should put on freshly washed or dry-cleaned clothing and change bedding to prevent reinfestation.

Note: In resistant cases of scabies, the course of treatment may be repeated one week later.

Overdosage:

If accidentally ingested, gastric lavage should be performed.

Storage : Store in a cool, dry place, below 30°C. Protect from light.
Keep away from children.

Presentation/Packing : Lotion 10% x 250ml

Shelflife : 3 years
