

VITAMIN B6 TABLET 10MG

Each tablet contains:
Pyridoxine HCl

10mg

Pharmacology:

Pyridoxine, a water-soluble vitamin, is involved principally in amino acid metabolism, but is also involved in carbohydrate and fat metabolism. It is also required for the formation of haemoglobin. Deficiency of pyridoxine is rare in humans due to its widespread distribution in foods.

Pyridoxine deficiency in adults leads to the development of peripheral neuritis; deficiency in children also affects the CNS.

Pyridoxine, pyridoxal and pyridoxamine are readily absorbed from gastro-intestinal tract following oral administration and are converted to the active forms pyridoxal phosphate and pyridoxamine phosphate. They are stored mainly in the liver where there is oxidation to 4-pyridoxic acid and other inactive metabolites which are excreted in the urine.

Indications:

As food / dietary supplement.

Contraindications:

Contraindicated in patients with known hypersensitivity to the product.

Side effects/adverse reactions:

The vitamin B's are very well tolerated. Adverse effects are very rarely reported. However, allergic reactions to some of them have been occasionally reported.

Dosage:

One tablet daily

Precautions / Warnings:

Pyridoxine may decrease the efficacy of levodopa in the treatment of parkinsonism. Therefore it should be used with caution for patients undergoing such therapy.

Pregnancy and Lactation

No adverse effects have been noted at recommended doses when used as clinically indicated

Drug Interactions:

Pyridoxine may interfere with the effects of concurrent levodopa therapy.

Symptoms and Treatment for overdosage and antidote(s):

Acute doses less than 500mg per day appear to be safe. Excessive doses may lower serum folate concentrations. Sensory neuropathy has been described with chronic dosing of 200mg daily.

Treatment of overdosage should be supportive and symptomatic.

Pack sizes: A bottle of 180 tablets.

Pack sizes (export only) : A bottle of 1000 tablets and Blister Pack: 100 x 10 tablets per strip.

Storage conditions: Store at or below 30°C.

Shelf-life: 3 years.

Description:

6mm, round, convex, plain, white tablets without markings.
