

N-BAC CREAM

Description: White opaque cream

Content:

Neomycin sulphate

0.5%w/w

Preservative: Chlorocresol 0.1%w/w

Indication:

It is used for the treatment of skin infections due to susceptible staphylococci and other neomycin-sensitive organisms.

Pharmacology:

Neomycin is an aminoglycoside antibiotic, which is active against many strains of Gram -ve bacteria, although not against Pseudomonas sp., and it is also active against many strains of Staphylococcus aureus.

Once neomycin is absorbed, it is rapidly and completely excreted in the urine in its active form.

Contraindications:

It is contraindicated in patients with known history of allergy to neomycin.

Precautions:

The topical use of neomycin in patients with extensive skin damage or perforated tympanic membranes may result in deafness. Prolonged local use should be avoided as it may lead to skin sensitization. Cross-resistance between kanamycin, framycetin and gentamicin has been reported.

Use in pregnancy and lactation:

Risk benefits should be considered when using on pregnant or lactating mothers.

Drug Interactions:

Nil for topical preparation.

Side Effects:

Hypersensitivity reactions, usually of delayed type, occur frequently during local treatment with neomycin, but may be masked by the combined use of a steroid. Cross sensitivity with other aminoglycoside antibiotics may occur.

Dosage and administration:

Apply sparingly to affected skin 2-3 times daily.

Treatment of over dosage:

Symptoms: Ototoxicity and nephrotoxicity may occur if neomycin is absorbed in large amounts.

Treatment: Discontinue use immediately and flush with clean water.

Storage conditions : Keep container tightly closed. Store in a cool, dry place below 30 °C. Protect from light.
Keep away from children.

Shelf life : 3 years

Presentation : Cream 0.5% X 15gm ; 500gm(EXPORT)

Manufactured & : PRIME PHARMACEUTICAL SDN. BHD.
