

PACKAGE INSERT

NAFTATE CREAM

Composition:
Tolnaftate 1 %w/w

Product Description: White and smooth cream.

Pharmacodynamics:
Tolnaftate is a highly active non-sensitising fungicidal agent that is used in the treatment of superficial fungal infections of the skin.

Pharmacokinetics:
The product is applied topically and systemic absorption is negligible.

Recommended Dosage:
Wash the affected area and dry thoroughly. A thin layer of the cream should be applied to cover affected areas twice daily or as directed by doctor. For athlete's foot (tinea pedis) and ringworm (tinea corporis), use daily for 4 weeks; for jock itch (tinea cruris), use daily for 2 weeks.

Route of Administration: Topical

Contraindications:
There are no known contraindications to tolinaftate, however if hypersensitivity to any of the ingredients occurs, treatment should be stopped.

Warnings and Precautions:
If a reaction suggesting sensitivity or chemical irritation should occur, use of the medication should be discontinued. Avoid introduction of cream into the eyes.
Do not use on children under 2 years of age except under the advice and supervision of a doctor. Advise to consult doctor if no improvement in four weeks in the case of athlete's foot and 2 weeks in jock's itch.

Interaction with Other Medicaments: None known.

Pregnancy and Lactation:
Whilst there is no specific evidence of safety of the drug in human pregnancy, tolinaftate has been in widespread topical use for many years without apparent ill consequence.

Side Effects:
Skin reactions including irritation and pruritus may occur, contact dermatitis has been reported.

Symptoms and Treatments of Overdose: Not Applicable.

Storage Conditions: Store below 30°C.

Pack Size: A tube of 15g and 30g.
Pack Size (export only): A jar of 400g.

Shelf-life: 3 years.
