

SULBUMIN 200 CAPSULE

Composition:

Each vegetable capsule contains:
Sulbutiamine.....200mg

Description:

Two pieces, size '0' maroon color hard vegetable capsule containing white color powder.

Pharmacodynamic:

Sulbutiamine is a thiamine derivative. Sulbutiamine crosses the blood brain barrier more easily than vitamin B1 because of its lipophilic properties. This leads to an increased formation of thiamine triphosphate that acts as a regulator of the synaptic transmission of many neurotransmission systems. It gives better physical resistance, improved intellectual performance and psychological balance.

Pharmacokinetic:

Small amounts of thiamine are well absorbed from gastrointestinal tract following oral administration. It is widely distributed to most body tissues and appears in breast milk. Very little is stored in the body and amounts in excess of the body's requirements are excreted in the urine as unchanged thiamine or as metabolites.

Indication:

Symptomatic treatment of all forms of function asthenia.

Dosage & administration:

For adult use only. 2-3 capsules daily. Capsule should be swallowed whole with a large glass of water, dividing the doses between the morning and midday meals. Duration of treatment is limited to 4 weeks.

Contraindication:

Contraindicated in those who hypersensitive to any ingredients in the product.

Warning & Precaution:

No special precautions are required.

Overdosage:

There may be agitation with euphoria and tremor in the extremities because of massive absorption of Sulbutiamine. These disorders are transient and rapidly resolve without sequelae.

Adverse reaction:

There is mild agitation observed in elderly person. Allergic skin reactions are rare. The urine may sometimes give out an odor.

Interaction:

Loop diuretics (furosemide, ethacrynic acid, bumetanide): Chronic use of loop diuretics may result in thiamin deficiency. Concomitant intake of thiamin with foods that contain sulfites may inactivate thiamin. Concomitant intake of thiamin with tea, coffee and decaffeinated coffee may inactivate thiamin. This can be reversed by taking thiamin supplements.

Storage:

Store in a dry place below 30°C.

Presentation:

Blister of 10 capsules. Box of 1, 3, 6, 10 and 50 blisters (Not all pack sizes are marketed).

Manufactured by:

PAHANG PHARMACY SDN. BHD. Registration No. 197101000448 (10826-K)
Lot 5979, Jalan Teratai, 5½ Mile Off Jalan Meru,
41050 Klang, Selangor D.E., Malaysia.
