PRESCRIBING INFORMATION

For the use of a Registered Medical Practitioner / a Hospital or Laboratory only

Bitvio™

Cream

(Mometasone Furoate Cream USP 0.1%)

Composition

Bitvio cream:

Mometasone Furoate USP 0.1%w/w

In a cream base q.s

Dosage Form: Cream

Product Description

A smooth, uniform, white to off white homogeneous cream, free from foreign matter.

Pharmacodynamics

Mometasone furoate, a synthetic corticosteroid, exhibit its anti-inflammatory, antipruritic and vasoconstrictive properties.

Pharmacokinetics

Systemic absorption following topical application of mometasone furoate 0.1% is minimal, approximately 0.4% of the applied dose the majority of which is excreted within 72 hours following application.

Indication

Indicated for the relief of the inflammatory and pruritic manifestations of corticosteroid responsive dermatoses,

Recommended Dose

A thin film of Bitvio Cream 0.1% should be applied to the affected skin areas once daily until the lesion heals or for duration of three weeks, whichever is sooner.

Mode of administration

Topical

Contraindications

Mometasone furoate cream 0.1% is contraindicated in those patients with a history of hypersensitivity to any of the components in the preparation.

Warning & precautions

Side effects that have been reported after systemic use of corticosteroids, including adrenal suppression, may also occur with topical corticosteroids, especially in infants and children.

Application of topical corticosteroids over large surface areas of the body or the use of occlusive dressings will be increase their systemic absorption. Paediatric patients may demonstrate greater susceptibility than mature patients, to topical corticosteroid included HPA axis suppression and Cushing's syndrome. This is because of a larger skin surface area to body weight ratio in paediatric patients.

When treating infants and children or in long term therapy therefore, appropriate precautions should be observed. Amount of topical corticosteroids used in children should not exceed the least amount necessary for effective therapy. Chronic corticosteroid therapy may impede growth and development of children.

Interactions with Other Medicaments

There are no drug interactions of note with Mometasone Furoate.

Pregnancy & lactation

There is inadequate evidence of safety in human pregnancy. Topical administration of corticosteroids to pregnant animals can cause abnormalities of fetal development including cleft palate and intra-uterine growth retardation. There may therefore be a very small risk of such effects in the human fetus. It should be used during pregnancy only if the potential benefit justifies potential risk to the fetus. Drugs of this class should not be used on pregnant patients in large amounts or for prolonged periods of time.

It is not known whether topical administration of corticosteroids could result in sufficient systemic absorption to produce detectable quantities in breast milk. Bitvio Cream should be administered to nursing mothers only after careful consideration of the benefit/risk relationship.

Side effects

Local adverse reactions rarely reported include burning, pruritis, tingling/stinging, and signs of skin atrophy. The following local adverse reactions have been reported infrequently with the use of other topical corticosteroids : irritation, hypertrichosis, hypopigmentation, perioral dermatitis, allergic contact dermatitis, maceration of the skin, secondary infection, striae and milliaria.

Overdose & Treatment"

Symptoms : Excessive, prolonged use of topical corticosteroids can suppress hypothalamic-pituitary-adrenal function resulting in secondary adrenal insufficiency.

Treatment : Appropriate symptomatic treatment is indicated. Acute hyper corticoid symptoms are virtually reversible. Treat electrolyte imbalance, if necessary. In case of chronic toxicity, slow withdrawal of corticosteroid is advised.

Storage Condition

Store at a temperature not exceeding 30°C. Do not freeze.

Shelf Life

36 months from the date of manufa

Packaging available

15g aluminium collapsible tube and flower pot type white HDPE cap with piercing spoke is packed in a unit printed duplex board carton.

20g aluminium collapsible tube and flower pot type white HDPE cap packed in
