JAUHI UBAT DARI KANAK-KANAK
FOR ANIMAL TREATMENT ONLY

AVATEC® 20%
Anticoccidial Premix

ACTIVE CONSTITUENT: 200 g/kg Lasalocid sodium

PRODUCT DESCRIPTION: Coarse, free flowing granular like particle

INDICATIONS:

For the prevention of coccidiosis caused by *Eimeria necatrix*, *E. tenella*, *E. acervulina*, *E. brunetti*, *E. maxima* and *E. mivati* in broiler or fryer chickens.
For the prevention of coccidiosis caused by *Eimeria meleagrimitis*, *E. gallopavonis*, and *E. adenoeides* in turkeys.

RECOMMENDED DOSE:

Chickens (broilers or fryers and layer replacement chickens):
Lasalocid is added to broiler chicken feed at concentrations from 68 to 113 g/ton for the prevention of coccidiosis caused by *Eimeria tenella*, *E. necatrix*, *E. acervulina*, *E. brunetti*, *E. mivati*, and *E. maxima*.
Turkeys (growing)
Lasalocid is added to growing turkey feed at concentrations from 68 to 113 g/ton for the prevention of coccidiosis caused by *Eimeria meleagrimitis*, *E. gallopavonis*, and *E. adenoeides*.

MODE OF ADMINISTRATION: Oral - Use continuously in the feed.

PHARMACODYNAMICS/PHARMACOKINETICS:

Lasalocid sodium is an ionophore anticoccidial and has the ability to strongly bind cations and transport them across biological membranes thereby interfering with the normal metabolic activities of *Eimeria* species.
The pharmacokinetic properties of lasalocid sodium have been widely studied in laboratory animals and poultry.
Oral doses of lasalocid are rapidly absorbed from the G.I. tract and widely distributed in major tissues followed by an equally rapid elimination from the body via the excreta.

CONTRAINDICATION:

NOT TO BE FED to horses or other equine species as fatal toxicosis may occur.
For use in feeds for broiler chickens, other table chickens, layer replacement chickens and turkeys.
Do not feed to other classes of birds or to other species of livestock.

WARNING AND PRECAUTIONS:

When mixing and handling lasalocid premix, use protective clothing, impervious gloves and a dust mask. Avoid contact with eyes. Operators should wash thoroughly with soap and water after handling. To ensure thorough dispersion of the product it should first be mixed with a suitable quantity of feed ingredients before incorporation in the final mix.

INTERACTIONS WITH OTHER MEDICAMENTS: Do not mix or use simultaneously with any other coccidiostat.

PREGNANCY AND LACTATION: Not Applicable.

SIDE EFFECTS: At normal dose rates Lasalocid sodium is of low toxicity. Overdosage may cause inappetence.

SYMPTOMS AND TREATMENT OF OVERDOSE: The clinical signs of overdose are depression of feed intake and reduced weight gain and in more severe cases lethargy, wing droop and abnormal posture. Birds showing clinical signs should be immediately removed from feed containing lasalocid sodium and placed on unmedicated feed. Due to rapid elimination of lasalocid sodium symptoms should disappear within a few days.

STORAGE: Store below 25°C away from sunlight. The bag should be closed securely after use.

DOSAGE FORM: Avatec® 20% is an oral premix for inclusion in the feed.

PACKAGING: Each lot is packaged in 20kg multiwalled paper bags. DISPOSAL OF CONTAINERS: Shake and empty contents into medicated feed. Shred and bury empty containers in a local authority landfill. Empty containers and product should not be burnt.

WITHHOLDING PERIODS: MEAT: NIL. EGGS: DO NOT USE in laying birds within 14 days of laying where eggs or egg products are to be used for human consumption or processing.
