Artwork of insert “**AVARIN**” HLM (PCL) code **RI-S079-H14-00-03**
Size : 132 x 186 mm (*F-S079-H14-64 / with catchcover*)

AVARIN

Composition :
Each Softgel Capsule Contains :
Simethicone 300 mg
Alverine citrate 60 mg

Other ingredients :
Silicon dioxide, gelatin, glycerin, purified water, iron oxide yellow, brilliant blue, iron oxide black, titanium dioxide.

Description :
10 minim, oblong shaped, opaque green, soft gelatin capsule containing pale white mass.

Source of Gelatin : Bovine

Indications :
This is an antispasmodic medication that reduces intestinal gas. This medication is recommended for relieving painful digestion with stomach distension. It is indicated for use in the relief of smooth muscle spasm, in condition such as irritable bowel syndrome.

Dosage :
Adult : One capsule 1-3 times daily after meals or as directed by a physician.

Route of Administration : Oral

Pharmacodynamics :
Alverine citrate :
Alverine citrate is a spasmolytic, which has a specific action on the smooth muscle of the alimentary tract and uterus, without affecting the heart, blood vessels and tracheal muscle at therapeutic doses.

Simethicone :
Simethicone is used as an antilflatulent in clinical practice because they decrease the surface tension of bubble present in the stomach, enabling to burst or form large air bubble which can be easily expelled from the gastrointestinal tract.

Pharmacokinetics :
Both Alverine citrate and simethicone are not significantly absorbed after oral administration, the clinical effects are resulting from the direct local pharmacological effect.

Side effect:
Nausea, headache, pruritis, rash, dizziness and hypotension or temporary lowering of blood pressure have been reported. Rare cases of urticaria, laryngeal oedema, allergic reactions, including anaphylaxis have also occurred. Cases of liver disorders is very rare, which resolves on discontinuation of treatment.

Contraindications :
Hypersensitivity to any components of product. Patients with intestinal obstruction or paralytic ileus. Pregnancy & lactation, children under 12 years old. Combination with sterculia (bulk-forming laxative) is contraindicated if patient has difficulty in swallowing.

Drug interactions :
There are no known drug interactions reported with other drugs. In order to avoid any potential interactions between several medications, you must systematically inform your doctor or pharmacist of all other current treatments.

Overdosage and management:
Cases of vertigo have been reported when a higher than recommended dosage is taken.

Shelf life : Three years from manufacturing date.

Packaging :
Unit carton containing 3x10, 5x10 capsules blister packed.

Warning and Precautions :
Store below 30°C in a dry place, away from direct sunlight.
Read the instructions carefully before use.
Do not use the product after the expiry date.
Do not use the product if there are any significant changes in appearance of the capsules.
Keep out of reach of children.
Jauhi ubat dari kanak-kanak.
