

Product Name	Dermcare Pyohex® 30 g/L Medicated Shampoo
Active Substance	Chlorhexidine gluconate 30 g/L
Preservative	Bronidox 2.5g/L
Description	Light yellow to brown, clear liquid.
Pharmacodynamics/ Pharmacokinetics	The primary pharmacodynamic action of the active substance is antimicrobial. Chlorhexidine is an antiseptic with broad spectrum activity. It is effective against many Gram negative and Gram positive bacteria. Chlorhexidine is absorbed onto bacterial membranes and interferes with membrane functions such as the sodium and potassium ATPase pump. At bacteriostatic concentrations, lysis of the membrane occurs, but at bactericidal concentrations, coagulation of the cytoplasm occurs without cell rupture. Chlorhexidine gluconate possesses virtually no secondary pharmacodynamic properties. Chlorhexidine gluconate is poorly absorbed via the skin or gastrointestinal tract as it binds strongly to skin and mucosa due to its cationic nature. The compound is not likely to pose a hazard to the animals or to the humans who are applying the Pyohex to their pets.
Environmental	Not applicable
Indication	Dermcare Pyohex 30g/L Medicated Shampoo is formulated to remove dirt and scale, degrease the skin and kill cutaneous micro-organisms which primarily or secondarily cause dermatitis. An aid in the treatment of superficial dermatitis associated with infections by <i>Staphylococcus intermedius</i> in dogs.
Recommended Dosage	Use approximately 1 mL of shampoo for every kilogram weight of dog. For example, 10 mL of shampoo should be enough to treat a 10 kg dog. Dermcare Pyohex™ 30 g/L Medicated Shampoo can be used on haired or non-haired skin.
Mode of Administration	Topical application. Wet the animal thoroughly with clean water. Apply Dermcare Pyohex™ 30 g/L Medicated Shampoo to the animal at several points and massage into the coat. A sponge may assist lathering and penetration of the shampoo into the coat. Leave on the coat for 10 minutes then rinse off with clean water. Repeat twice weekly until symptoms abate, then weekly or as directed by your veterinary surgeon.
Contraindications	None known.
Warnings and Precautions	1. Use with caution around eyes. If foam enters eye, flush thoroughly with clean water. Seek veterinary advice if eye changes are observed. 2. Animals should not be left unattended during the standing process as licking or inhaling foam may result in irritation of the gastrointestinal or respiratory tracts. 3. Antibiotic therapy is recommended for the initial control of infection or where deep pyoderma exist.
Interactions with other Medicaments:	There are no known drug interactions with this product.
Pregnancy/Lactation	None known.

Side Effects	Can cause eye irritation. Do not allow the shampoo to enter eyes. Licking or inhaling shampoo foam may result in irritation of the gastrointestinal or respiratory tracts. Do not allow animals to lick or inhale shampoo during application.
Safety Directions	Will irritate the eyes and skin. Avoid contact with eyes and skin. When using the product wear rubber gloves. If product in eyes, wash it out immediately with water. Wash hands after use.
Overdose and Treatment	If poisoning occurs, contact a doctor or Poisons Information Centre. If swallowed, do NOT induce vomiting. Give a glass of water.
Withdrawal Period	Nil.
Storage Conditions	Store below 30°C. Room temperature. Do not freeze.
Pack Size:	250 mL
