

DEFUNGO

PRODUCT NAME

DEFUNGO 0.1G (VAGINAL TABLET)

NAME AND STRENGTH OF ACTIVE SUBSTANCE

DEFUNGO 0.1G: Each vaginal tablet contains 0.1 g Clotrimazole

PRODUCT DESCRIPTION

DEFUNGO 0.1G: White, oblong and biconvex tablet engraved with the "Siam" logo on one side and the letter "0.1" on the other side

PHARMACODYNAMICS

Pharmacotherapeutic group: gynaecological anti-infective and antiseptics - imidazole derivatives

Mechanism of action

Clotrimazole acts against fungi by inhibiting ergosterol synthesis. Inhibition of ergosterol synthesis leads to structural and functional impairment of the fungal cytoplasmic membrane. Clotrimazole has a broad antimycotic spectrum of action which includes dermatophytes, yeasts, moulds, etc.

PHARMACOKINETICS

Clotrimazole applied intravaginally does not lead to measurable systemic effects or side effects. Pharmacokinetic investigations have shown that only a small amount of clotrimazole, about 3-10% of the dose is absorbed after vaginal application.

INDICATION

Infections of the genital region (vaginitis) caused by fungi (usually Candida) and superinfections caused by Clotrimazole-sensitive bacteria.

DOSAGE AND ADMINISTRATION

DEFUNGO 0.1G (VAGINAL TABLET):

First infection

Insert 2 Defungo 0.1g (vaginal tablet) into the vagina for three consecutive nights.

Reinfection

Insert 1 Defungo 0.1g (vaginal tablet) into the vagina for six consecutive nights. If necessary, 2 Defungo 0.1g (vaginal tablet) daily, 1 in the morning and 1 in the evening for 6-12 days.

Instruction for use

- For vaginal use only. The medicine should be inserted as deeply as possible into the vagina, best achieved when lying back with the legs bent up
- Treatment should be timed so as to avoid the menstrual period and be finished before the onset of menstruation
- Do not use tampons, intravaginal douches, spermicides or other vaginal products while using this product
- Avoidance of vaginal intercourse is recommended in case of vaginal infection and while using this product the partner could become infected

CONTRAINDICATIONS

Hypersensitivity to clotrimazole.

WARNINGS AND PRECAUTIONS

Defungo may cause damage to latex contraceptives such as condom, thus its effectiveness may be reduced. Alternative precautions should be used for at least five days after using this product.

EFFECTS ON THE ABILITY TO DRIVE AND USE MACHINES

Clotrimazole vaginal tablet has no or negligible influence on the ability to drive or use machinery.

INTERACTIONS WITH OTHER MEDICAMENTS

Concomitant use of vaginal clotrimazole and oral tacrolimus (immunosuppressant) might lead to increased tacrolimus plasma levels and similarly with sirolimus. If necessary, plasma levels of tacrolimus or sirolimus should be determined to monitor the signs and symptoms of toxicity.

PREGNANCY AND LACTATIONPregnancy

At the low systemic exposures of clotrimazole following vaginal treatment, harmful effects with respect to reproductive toxicity are not predicted.

Lactation

Toxicological data in animals have shown excretion of clotrimazole/metabolites in milk after intravenous administration. Breast-feeding should be discontinued during treatment with clotrimazole.

UNDESIRABLE EFFECTS

Very rarely, local irritation and burning sensation might occur at the site of application (e.g. pruritus, erythema, genital peeling and discomfort).

OVERDOSE AND TREATMENT

No risk of acute intoxication is seen as it is unlikely to occur following a single vaginal application.

STORAGE CONDITIONS

Store below 30°C

SHELF LIFE

2 years

DOSAGE FORMS AND PACKAGING AVAILABLE

DEFUNGO 0.1G: 1 strip x 6 vaginal tablets of 0.1 g per unit box, each sealed in aluminium foil

Manufactured by:- SIAM BHEASACH CO., LTD.
