

PRIME'S FOLIC ACID TABLET 5MG

Description: Yellow, round, top-scored tablet. Diameter = 6.00mm

Contents

Each tablet contains : Folic acid BP 5mg

Pharmacology:

Folic acid is reduced in the body to tetrahydrofolate which is a coenzyme for various metabolic processes involving synthesis from one unit carbon units. It is necessary for the normal production of red blood cells, including maturation of megaloblasts into normoblasts.

Indication:

Megaloblastic anaemia due to folic acid deficiency.

Precautions:

Use with caution in patients with pernicious anaemia because folic acid will correct hematologic abnormalities but neurologic problems will progress irreversibly.

Recommended Dosage:

In the treatment of megaloblastic anaemia, folic acid may be given by mouth in an initial dosage of 10 to 20mg daily for 14 days, or until a haemopoietic response has been obtained; the daily maintenance dose is 2.5 to 10mg. Children may be given 5 to 15 mg daily according to the severity of deficiency state.

Storage	: Keep container tightly closed. Store in a cool, dry place below 30°C. Protect from light.
Presentation/Packing	: Tablet 5mg x 1000's (Export) ; 100's
Shelflife	: 3 years
