

194mm

Duafolec 5mg Tablet

DESCRIPTION

A 6.5mm in diameter, round, flat, scored on one side, plain on the other side, yellow tablet.

Duafolec 5mg Tablet contains Folic Acid 5 mg per tablet.

PROPERTIES

Folic Acid, after conversion to tetrahydrofolic acid, is necessary for normal erythropoiesis and nucleoprotein synthesis. Deficiency of folic acid may lead to megaloblastic and macrocytic anaemias and glosaitis.

PHARMACODYNAMICS

Folic acid is rapidly absorbed from normal diets and is distributed in body tissues. The principal storage site is the liver.

PHARMACOKINETICS

There is an enterohepatic circulation for folate; about 4 to 5 mcg is excreted in the urine daily. Administration of larger doses of folic acid leads to proportionately more of the vitamin being excreted in the urine. Folate is distributed in breast milk.

INDICATIONS

Treatment and prevention of folate deficiency state which may lead to megaloblastic and macrocytic anaemias.

For the prevention of neural tube defect in the foetus.

SIDE EFFECTS

Folic acid is generally well tolerated. Gastrointestinal disturbances may occur. Allergic reaction have been reported rarely.

PRECAUTIONS

Should not be given alone or in conjunction with inadequate amounts of cyanocobalamin for the treatment of pernicious anaemia and should not be used in undiagnosed megaloblastic anaemia unless B12 is administered concurrently.

DOSAGE

Treatment and prevention of folate deficiency state:

Initial Dose : 10 – 20 mg daily for 14 days.

Maintenance dose : 2.5 – 10 mg daily.

Prevention of neural tube defect in foetus:

5mg daily starting before pregnancy and continued through the first trimester

STORAGE CONDITIONS AND USER INSTRUCTIONS

Keep container tightly closed.

Store in a dry place below 30°C.

Protect from light.

Keep out of reach of children.

Jauhi daripada kanak-kanak.

Shelf life : Please refer to outer package.

Route Of Administration: Oral
