

DAILY-VITE MULTIVITAMIN SYRUP FOR CHILDREN

MAL19986553X

DESCRIPTION:

SYRUP

Colour : Yellow

Flavour : Orange

PER 5 ML CONTAINS:

Vitamin A	2,000 IU	Vitamin B12	3.0 mcg
Vitamin D	400 IU	Niacinamide.....	10 mg
Vitamin B1	1.2 mg	Vitamin C	50 mg
Vitamin B2	1.3 mg	L-Lysine Monohydrochloride.....	37.5 mg
Vitamin B6	0.8 mg		

Preservatives:

Methyl Paraben 0.1% w/v, Propyl Paraben 0.01% w/v, and Sodium Benzoate 0.1% w/v.

ACTIONS:

Vitamin A is essential for normal function of the retina; growth of bone; reproduction and embryonic development; regulation of growth and differentiation of epithelial tissues and nervous system.

Vitamin D is essential for promoting absorption and utilisation of calcium and phosphate and for normal calcification of bone. Along with parathyroid hormone and calcitonin, it regulates serum calcium and phosphate concentrations as needed.

Vitamin B1 (Thiamine) is essential for energy metabolism especially carbohydrates. It is phosphorylated into the active coenzyme, Vitamin B1 pyrophosphate (TTP; co-carboxylase), which is a vital factor in carbohydrate metabolism. It also maintains a healthy nervous system, normal gastro-intestinal and cardiovascular system.

Vitamin B2 (Riboflavin) is converted to the activated forms FMN (flavine mononucleotide) which are essential for normal tissue respiration. Vitamin B2 is also necessary for maintaining erythrocyte integrity and healthy eyes, skin and mouth.

Vitamin B6 (Pyridoxine) is converted to pyridoxal phosphate that is the coenzyme for a variety of metabolic functions affecting protein, carbohydrate, and lipid utilisation. Pyridoxine is involved in conversion of tryptophan to niacin or serotonin.

Vitamin B12 (Cyanocobalamin), water-soluble vitamin, occurs in the body mainly as methycobalamin (mecobalamin) and as adenosylcobalamin (cobamamide) and hydroxocobalamin. Mecobalamin and cobamamide act as coenzymes in nucleic acid synthesis. Mecobalamin is also closely involved with Folic Acid in several important metabolic pathways. Vitamin B12 is necessary for the synthesis of thymidylate, which is the characteristic base of DNA. The vitamin plays a biochemical role in the maintenance of myelin in the nervous system.

Vitamin C (Ascorbic Acid) is essential for collagen formation and tissue repair in the body; metabolism of Folic Acid; metabolism of proteins; enhances iron absorption and preservation of blood vessel integrity. Thus, it maintains healthy skin, blood vessels, connective tissues, gum or other related body structures.

Niacinamide/Nicotinamide is converted to NAD (Nicotinamide Adenine Dinucleotide) and NADP (Nicotinamide Adenine Dinucleotide Phosphate) which are involved in electron transfer reactions in the respiration chain at cellular level. Thus, it is essential for utilisation of major nutrients. Nicotinamide is also necessary for normal function of the gastro-intestinal tract, normal skin conditions and nervous system.

Lysine is an Amino Acid that is an essential constituent of the diet. Lysine has been used in the treatment of hypochloraemic alkalosis. Lysine is also used as a dietary supplement.

INDICATIONS:

As a health supplement.

RECOMMENDED DOSAGE:

Children 4 year and above: 5 ml (1 teaspoonful) once daily. To be taken with meals.

CONTRAINDICATIONS:

It is contraindicated in patients with the presence of hypervitaminosis and hypercalamia conditions.

PRECAUTIONS/WARNINGS:

Ingestion of the medication is occasionally followed by slight yellowish discoloration of the urine. This is due to the Riboflavin (Vitamin B2) content of the preparation and is completely harmless. This preparation should not be for long usage to avoid hypervitaminosis and hypercalamia.

SIDE EFFECTS/ADVERSE REACTIONS:

With the recommended dosage, side effects are unlikely to occur.

PACKING/PACK SIZE(S):

Amber PET bottles of 100 ml, 150 ml and 200 ml.

Amber glass bottles of 100 ml, 250 ml and 500 ml.

JAUHI DARIPADA KANAK-KANAK

KEEP OUT OF REACH OF CHILDREN

SHAKE WELL BEFORE USE

RECOMMENDED DAILY ALLOWANCES (USRDA):

VITAMINS/MINERALS	UNIT	ADULTS AND CHILDREN 4 OR MORE YEARS OF AGE
Vitamin A	IU	5,000
Vitamin D	IU	400
Ascorbic Acid (Vitamin C)	mg	60
Thiamine (Vitamin B1)	mg	1.5
Riboflavin (Vitamin B2)	mg	1.7
Niacin (Nicotinic Acid)	mg	20
Pyridoxine (Vitamin B6)	mg	2
Cyanocobalamin (Vitamin B12)	mcg	6

MANUFACTURER/PRODUCT REGISTRATION HOLDER:

DYNAPHARM (M) SDN. BHD. 198001011897 (65683-V)
