Description

Oblong shape, dark-brown opaque, 14 mm oblong with longitudinal sealed soft gelatin capsule with smooth and shiny appearance. The capsule is printed with “PHARMATON” in white and with light vanillin like odor.
Capsule content: yellow homogeneous paste.

Properties

PHARMATON CAPSULES contain three well-balanced groups of active ingredients:

- concentrated, standardized Ginseng Extract G115
- Substances acting on the metabolism (vitamins, minerals, trace elements)
- Lecithin

Thus, by virtue of their composition, PHARMATON CAPSULES is indicated both for adults as well as for elderly persons. The Ginseng Extract G115 is prepared according to a process from selected roots of *Panax ginseng* C.A Meyer. This preparation supports mental and physical performance.

The Ginseng Extract G115 is standardized on the content of the active ingredients (ginsenosides). The 18 important vitamins, minerals and trace elements contained in PHARMATON CAPSULES are present in dosages which cover the daily requirement of the human body.

PHARMATON CAPSULES is a suitable combination that provided Ginseng G115 extract and essential vitamins and minerals.

Indications

Used as a health supplement.

Dosage and Administration

Adults: 1 capsule once daily.
To be taken with food, preferably at breakfast.
Not recommended for use in children under 12 years.
There are no special dosage recommendations for the elderly.

The capsules are to be swallowed whole with liquid, without chewing.
In case of difficulty in swallowing: cut the capsule open, squeeze the contents onto a spoon and mix with some marmalade, honey or other food before taking.
Do not exceed the stated dose.

Side-effects

The following CIOMS frequency rating is used, when applicable:
Very common ≥ 10%; Common ≥ 1 and < 10%; Uncommon ≥ 0.1 and <1%;
Rare × 0.01 and < 0.1%; Very rare < 0.01%; Not known (cannot be estimated from available data).

Immune system disorders:

Not known: Hypersensitivity

Psychiatric disorders:

Not known: insomnia

Nervous system disorder:

Common: Headache
Not known: dizziness

Gastro-intestinal disorders:

Common: Nausea, vomiting
Uncommon: diarrhea
Not known: abdominal pain

Skin and subcutaneous tissues disorders:

Not known: Rash, pruritus

Contraindications

In case of rare hereditary conditions that may be incompatible with an excipient of the product (please refer to section Special warnings and precautions), the use of the product is contraindicated.

- Disturbance of calcium metabolism (hypercalcaemia and hypercalciuria)
- Hypervitaminosis A or D
- Renal insufficiency
- During therapy with retinoids (e.g. against acne)
- During therapy with vitamin D
- Known hypersensitivity to any ingredients of the product
- History of allergy to soya or peanut
- Pregnant women

Special Warnings and Precautions

This product contains 26 mg of lactose per maximum recommended daily dose. Patients with the rare hereditary condition of galactose intolerance, i.e., galactosaemia, should not take this health supplement.
Safe use in lactating women and children has not been established
Safety on long term use has not been established.

For Diabetic patients, this product contains 308 mg of carbohydrates per dose of 1 capsule.

Pregnancy and Lactation

PHARMATON CAPSULES contains, among other ingredients, vitamins A in amounts corresponding to or somewhat above the recommended daily requirement.

Controlled studies with pregnant or breastfeeding women are not available. The use of this product by pregnant or breastfeeding women should be decided by doctor or pharmacist.

Fertility

No studies on the effect on human fertility have been conducted.

Effects on the ability to drive and use machines

No studies on the effects on the ability to drive and use machines have been performed.

Interactions

In case of concomitant intake of ginseng preparations and anticoagulants, the effect of oral blood thinning medication (e.g. warfarin) may potentially be reduced. Patients on blood thinning medications should seek medical advice from doctor or pharmacist before starting this product.

Interactions of iron with tetracycline antibiotics (tetracycline, doxycycline, minocycline) and B6 and L- Dopa are known. Patients on any of these medications should seek medical advice from doctor or pharmacist before starting this product.

Overdose

The toxicity of the product in large overdoses will be that of the liposoluble vitamins A and D.
Prolonged daily intake of larger amounts corresponding to 37 capsules for vitamin A and 10 capsules for vitamin D can cause symptoms of chronic toxicity such as vomiting, headache, drowsiness, and diarrhoea. Acute symptoms are only seen at even higher doses.
In general, the total daily iron and zinc intake should not exceed 20 mg and 15 mg respectively.

Galenic presentation

The product is available in the form of soft gelatin capsule. The soft gelatin capsule in this preparation is non-porcine and of bovine origin.

Packages

Bottles of 30 and 100 capsules.

Storage condition

Store below 25°C.
Protect from light and moisture. Keep out of reach of children.
