

CALCIUM MX-K2 PLUS

CAPSULE

Description

20 minim oblong opaque white and blue bi-color softgel capsule with off white suspension.

Each SURBEX® CALCIUM MX-K2 PLUS CAPSULES provides

Calcium.....	350 mg
(as Calcium Carbonate 875mg)	
Vitamin D3	500 I.U.
(Cholecalciferol 12.5mcg)	
Vitamin K2	0.06 mg

Indication

As a health supplement.

Dosage and Administration

Usual adult dosage is 1-2 capsules to be taken once daily before meal or as directed by doctor or pharmacist.

Side Effects

SURBEX® CALCIUM MX-K2 PLUS CAPSULES is generally well tolerated. At large amount, calcium supplements can lead to anorexia, nausea, vomiting and constipation, which are symptoms of hypercalcemia.

Interaction with Other Medicaments

Calcium carbonate may interfere with the absorption of concomitantly administered tetracycline preparations.

Thiazide diuretics reduce the urinary excretion of calcium. Due to increased risk of hypercalcaemia, serum calcium should be regularly monitored during concomitant use of thiazide diuretics especially in patients with hyperparathyroidism.

* Vitamin K can have a serious and potentially dangerous interaction with anticoagulants such as warfarin, as well as phenprocoumon, acenocoumarol, and tiocloamarol. These drugs antagonize the activity of vitamin K, leading to the depletion of vitamin K-dependent clotting factors. People taking warfarin and similar anticoagulants need to maintain a consistent intake of vitamin K from food and supplements because sudden changes in vitamin K intakes can increase or decrease the anticoagulant effect.

Contraindications

SURBEX® CALCIUM MX-K2 PLUS CAPSULES is contraindicated in patients known to be hypersensitive to any of its component.

WARNING

Consult a healthcare practitioner if you are on anticoagulant/ blood thinner products.

Package

Blister: 5's, 10's, 30's, and 60's

Bottle: 30's, and 60's

Not all pack sizes are marketed
