

USER INFORMATION

AIN ChlorAl

ISOPROPYL ALCOHOL 75% v/v and CHLORHEXIDINE GLUCONATE 0.5% w/v
HAND DISINFECTANT

Antiseptic Cutaneous Solution

Composition:

The Solution Contains:

Isopropyl Alcohol 75% v/v

Chlorhexidine Gluconate 0.5% w/v

Product Description:

Pink clear solution.

Pharmacodynamics:

Bisbiguanide antiseptics exert their lethal effect upon bacterial cells through non-specific interaction with acidic phospholipids of the cell membranes. Since there is little percutaneous absorption of isopropyl alcohol or chlorhexidine gluconate, pharmacodynamic studies have not been undertaken.

Pharmacokinetics:

There is little absorption of isopropyl alcohol or of chlorhexidine gluconate through intact skin. Pharmacokinetic studies have not been conducted with the product.

Indication:

To be used undiluted for hand and skin disinfectant.

Recommended Dosage:

Wet the hands with sufficient amount of **AIN ChlorAl** solution and rub gently the affected area for about 30 seconds and proceed until the hands are dry.

Method of Administration: Topical

Contraindications:

The medicinal product is contraindicated where patients have shown previous hypersensitivity to chlorhexidine or isopropyl alcohol.

Warning and Precautions:

The solution is an irritant to eyes and mucous membrane. Keep the solution away from these areas. Wash promptly and thoroughly with water if the solution comes in contact with the eyes. Do not use on open skin wound, broken or damage skin, for lumbar puncture or in children less than 2 months of age.

Avoid prolonged skin contact as the solution is alcoholic solutions. Allergic or irritation skin reactions with chlorhexidine is rarely reported.

Do not use with electrocautery procedures until dry. Remove any soaked materials, drapes or gowns before proceeding.

For external use only. Flammable, keep away from fire or flame. Do not use with ignition source (e.g., cautery, laser), avoid getting solution into hairy areas. Wet hair is flammable. Hair may take up to 1 hour to dry. Do not allow solution to pool and remove all wet materials from preparation area. Do not use unless seal is intact.

AIN ChlorAl contains chlorhexidine. Chlorhexidine is known to induce hypersensitivity, including generalised allergic reactions and anaphylactic shock. The prevalence of chlorhexidine hypersensitivity is unknown, but available literature suggests this is likely to be very rare. **AIN ChlorAl** should not be administered to anyone with a possible history of an allergic reaction to chlorhexidine.

If any signs or symptoms of a suspected hypersensitivity reaction such as itching, skin rash, redness, swelling, breathing difficulties, light headedness, and rapid heart rate develop, immediately stop using the product. Appropriate therapeutic countermeasures must be instituted as clinically indicated.

Interactions with Other Medicaments:

Alcohol should not be brought into contact with some vaccines and skin test injections (patch tests). If in doubt, consult the vaccine manufacturers literature. Chlorhexidine salts are incompatible with soaps and other anionic materials.

Pregnancy and Lactation:

There are no studies with this product in pregnant or lactating women. However as percutaneous absorption is negligible, there is no reason why this product may not be used during pregnancy or by breast feeding mothers.

Adverse Effects/Undesirable Effects:

Rarely allergic or irritation skin reactions have been reported with chlorhexidine and isopropyl alcohol. Immune system disorders

Frequency not known: Hypersensitivity including anaphylactic shock

Overdose and Treatment:

There are no reports of this occurring and the nature of the product makes it unlikely.

Storage Conditions:

Do not store above 30°C.

Shelf Life:

2 year from manufacturing date in the proposed storage conditions.

Dosage Forms and Packaging Available:

500mL x 10 in High Density Polyethylene (HDPE) bottle with pump dispenser per box.

Manufacturer/Product Registration Holder:

AIN MEDICARE SDN.BHD.

Lot 4933, 4934 & PT2464, Jalan 6/44,
