

RONAXAN PS 5%w/w

Powder for Oral Solution

Composition: Each Ronaxan PS 5% 100g contains doxycycline (as hyclate) 5.0g.

Product Description: Pale yellow powder

Pharmacodynamics: The tetracyclines are bacteriostatic antibiotics which inhibit the bacterial protein synthesis by blocking binding of transfer RNA to the messenger RNA-ribosome complex. Doxycycline is a second-generation tetracycline with a broad spectrum.The increased activity of doxycycline against numerous pathogens is attributed to a better penetration of the antibiotic into such pathogens.It is active against a wide range of gram-negative and gram-positive microorganism (*Bordetella sp., Pasteurella sp., Haemophilus sp., Escherichia coli, Salmonella sp., Clostridium sp.*) as well as mycoplasmas,including strains resistant to first generation tetracyclines.

Pharmacokinetics: After oral administration in feed, doxycycline is highly bioavailable with mean serum concentrations of 0.54ug/ml after administration of a 5mg/kg dose twice a day during 5 days.The tissue concentrations are higher than the serum concentrations.

Indication:
Treatment of infections caused by doxycycline-sensitive germs:
• Preventive and curative treatment of respiratory and digestive infections in calves
• Preventive and curative treatment of respiratory infections in poultry
• Treatment of respiratory infections in pigs

Routes of administration: Oral in the drinking water or liquid feed

Dosage: 10mg per kg and per day, equivalent to 1g Ronaxan PS 5% per 5kg bodyweight.
Particular case of poultry:
Less than 2 weeks old: 1g per litre of drinking water and per day
More than 2 weeks old: 2g per litre of drinking water and per day
For prevention: 1 to 3 days
For treatment: 3 to 5 days

Contraindications: None known

Warnings and Precautions:
Special precautions for use
Do not administer to ruminant bovines as the oral route is not very efficient.

Special warnings for the target species
• Use in the feed : the medicated feed must be the only feed distributed throughout the duration of the treatment.
• Use in drinking water : the medicated drinking water must be the only water distributed throughout the duration of treatment.
Special precautions to be taken by the person administering the product to animals
Wash hands after use.

Keep out of the reach of children.
Special precautions for the disposal of unused product or waste materials
Any unused veterinary pharmaceutical product or waste materials derived from such veterinary pharmaceutical products shall be disposed of in accordance with local requirements.

Interactions with other medicaments: Doxycycline should not be associated with other antibiotics especially bactericidal drugs such as the β -lactams.The half-life of doxycycline is reduced by concurrent administration of barbiturates or phenytoin. Simultaneous administration of oral absorbants and antiacids should be avoided as they reduce doxycycline availability.

Statement on usage during pregnancy and lactation: Tolerance studies in pregnant sows at three times the therapeutic dosage administered for eight days have shown doxycycline to be well tolerated without any signs of toxicity neither on sows nor on piglets, irrespective of the stage of pregnancy.

Adverse Effects: None known

Overdose and Treatment: Ronaxan PS 5% is well tolerated as shown in the tolerance studies when administered to 45 day old piglets, at five times the therapeutic dosage and twice as long as recommended.

Storage Conditions: The product should be stored at a temperature not exceeding 25°C, protected from light.

Withdrawal Period:
Calves: 14 days
Chicken: 4 days
Turkey: 6 days
Pigs: 6 days
Eggs: Do not use in layers when eggs are delivered for human consumption

Packing: 100g/ 1kg in HDPE container

FOR VETERINARY USE ONLY
