

SHIN POONG GENTAMICIN SULFATE CREAM

NAME OF PRODUCT SHIN POONG GENTAMICIN sulfate Cream

COMPOSITION Each gram contains Gentamicin Sulfate 1mg(potency), methylparaben 1mg, propylparaben 0.2mg

THERAPEUTIC PROPERTIES Gentamicin and other aminoglycosides antibiotics interfere with bacterial protein synthesis by binding primarily to the 30S subunit of bacterial ribosomes. Other mechanisms of action may contribute to the bacterial effect to Gentamicin.

INDICATIONS

It's effective against any strains of bacteria, such as *Pseudomonas aeruginosa*, *Proteus vulgaris*, *E.Coli*, *Klebsiella*, *Enterobacter*, *Staphylococcus*.

Streptococcus: Impetigo, eczema and eczematoid dermatitis, skin ulcer, acne and secondary infection.

DOSAGE AND ADMINISTRATION

Apply gently a small amount of cream to the lesion once or several times daily. The treated area may be covered with a dressing if desired.

ADVERSE EFFECTS

Ototoxicity has occurred with the topical application of aminoglycosides to mucous membranes, large areas of denuded skin or burns.

CONTRAINDICATIONS

Gentamicin is contraindicated in patients with a known history of allergy to it and probably to other aminoglycosides. If symptoms of ototoxicity occur, Gentamicin should be withdrawn immediately.

PRECAUTIONS

1. In case of anaphylactic symptoms, such as pruritus flare, tumefaction and vesicle etc, occur, discontinue to use.
2. Forbid long-term administration

3. In case of hypersensitiveness, such as exanthema, occurs, discontinue to use.
4. Forbid long-term administration because dysacusis or nephrotoxicity may occur.
5. Do not administer for ophthalmic use.

USAGE IN PREGNANCY

Not recommended

INCOMPATIBILITIES

None

PACKING SIZE

10g

STORAGE CONDITIONS

Store in a tight container at room temperature (30°C) or below.

MANUFACTURED BY

SHIN POONG PHARM.CO.,LTD.
