

ECONAZINE[®] CREAM

Econazine is a water-miscible, white cream, which contains the antifungal and anti-inflammatory agent.

Ingredient(s):

Each gram contains:

Econazole Nitrate 10mg(1%)

Triamcinolone Acetonide 1mg(0.1%)

Preservatives:

Methyl Paraben 1mg

Propyl Paraben 1mg

Pharmacodynamics:

1. Econazole Nitrate has high fungicidal and bactericidal activity.
2. Triamcinolone Acetonide has excellent anti-inflammatory, anti-pruritic, anti-allergic properties.

Pharmacokinetics:

1. Econazole nitrate is only slightly absorbed from the skin.
2. Topical corticosteroids can be absorbed from normal intact skin. Inflammation and/or other disease processes in the skin increase percutaneous absorption.

Indication(s):

Indicated for the topical treatment of inflammatory dermatoses where infected by susceptible organisms co-exist eg. inflammatory fungal infections and infective eczema.

Dosage and Administration:

Apply lightly over the affected area several times daily, for 14 days.

Route of administration:

Topical.

Precaution(s) / Warning(s):

1. It should not be used on tubercular or luetic skin infection or on viral diseases (eg. herpes, vaccinia, varicella).
2. It should not be administered to patients who have previously exhibited hypersensitivity to Imidazole or corticosteroids.
3. Long-term continuous steroid therapy should be avoided since adrenal suppression can occur, particularly when infants or children are treated or when occlusive dressing is applied. Long-term therapy with corticosteroids can cause skin lesions such as atrophy, telangiectasia and striae.

Side Effect(s) / Adverse Reaction(s):

Transient local mild irritation at the application site and hypersensitivity.

Symptoms and Treatment for Overdosage, and Antidote(s):

Overdosage in humans has not been reported to date.

Shelf-Life:

3 years from the date of manufacture.
