

PRODUCT LITERATURE

GLYCERIN OF THYMOL

Each 100ml contains

Glycerol	0.1% v/v
Thymol	0.075% w/v

Contains Alcohol DN	4%v/v
---------------------	-------

Preservative

Sodium Benzoate	0.08% w/v
-----------------	-----------

Product description

Red coloured clear liquid with pleasant odour.

Pharmacodynamic properties

The product is used as a mouthwash and as a gargle and as such has a mechanical cleansing action and freshens the mouth. Thymol has a disinfectant action which is diminished through combination with protein though it is less toxic and has a more powerful disinfectant action than phenol. Its lower solubility in water than phenol and its loss of potency in the presence of protein reduce its overall effectiveness as a disinfectant.

Glycerol is used mainly as a solvent for the thymol and the various essential oils and other substances which are used as flavouring agents in the product.

Pharmacokinetic properties

Thymol is absorbed from the intestine and excreted in the urine as unchanged drug and as the glucuronide.

Glycerol is absorbed from the intestine and metabolised as carbon dioxide and glycogen or it is used in the synthesis of body fats.

Indication

Used as mouthwash for bad breath and general oral hygiene

Recommended dose

Dilute 1 part with 3 parts water. Use as gargle or mouthwash 3 or 4 times a day

Route of Administration

Oral. Not to be swallowed.

Contraindications

Hypersensitivity to any of the ingredients.

Warning and Precaution

The product is to be used after dilution of one part with three parts of warm water; all unused diluted solution should be discarded due to the possible contamination with resistant micro-organisms. It should not be swallowed.

Pregnancy and lactation

No adverse problems have been reported. As with all medicines, is should only be used under medical supervision in pregnant women or nursing mothers.

Side effect

It can be irritant to the gastric mucosa; rashes may occur. Its prolonged use should be avoided.

Symptoms and Treatment of Overdose

The product is not intended for ingestion, but, in the case of ingestion (accidental or otherwise) resulting in overdosage, treatment measures include gastric lavage with intensive symptomatic supportive therapy.

Storage Condition

Store below 30°C, in a dry place, protected from direct light. Keep away from reach of children

Shelf life

2 years from date of manufacture.

Packing

Packed in plastic bottle of 60 ml and 90ml.

FOR EXTERNAL USE ONLY
SHAKE WELL BEFORE USE
