

Neurorubine™ -Forte

Film-coated tablets

For painful conditions of neurological origin

Composition

Each tablet contains:

Vitamin B1	200 mg
Vitamin B6	50 mg
Vitamin B12	1000 mcg

Properties, effects

Mode of action: Neurorubine-Forte combines in high dosage three important vitamins essential for the proper functioning of the nervous system. Each of these vitamins is indispensable to ensure the normal metabolic process in nerve cells. Administered simultaneously and in pharmacodynamic high doses, the components exert their individual neurotropic effect.

Indications

As an adjuvant in the treatment of:

Neuritic pain: acute or chronic neuritis and polyneuritis.

Neuralgia

Toxic damage to nerve tissue: alcoholism, diabetic polyneuropathy, drug intoxication.

For the prophylaxis of vitamin B6 deficiency during treatment with isoniazid, penicillamine, cycloserine, hydralazine.

Usual dosage

The dosage should be adapted to each individual case:

1-3 tablets daily.

Severe cases: Treatment to be commenced with 3 tablets daily until pain subsides.

Route of Administration

Oral use

Pregnancy, lactation

Neurorubine-Forte may be taken during pregnancy and lactation. Controlled studies in women have shown no risks to foetus during the first trimester; there is no evidence suggesting a risk in the course of the remaining trimesters and there is little probability of possible damage to the foetus.

Contraindications

Owing to the vitamin B12 content of the preparation, patients with psoriasis should not receive Neurorubine-Forte tablet. Existing acne can be aggravated by Neurorubine-Forte tablet due to the vitamin B6 content.

Oral administration of vitamin B12 is only possible if the gastrointestinal tract is functioning normally.

Hypersensitivity to vitamin B1, B6 or B12.

Adverse effects

Hypersensitivity reactions are rare and are observed mainly in the skin. Erythema, desquamation of facial skin, rash and acne can be attributable to one of the vitamins.

Interactions

The effect of levodopa is diminished by vitamin B6.

Overdosage

There are no data on overdosage. Symptomatic treatment, gastric lavage and general supportive measures are indicated.

Presentations

Neurorubine™ -Forte: Pink, round, biconvex, film coated tablets embossed 'TP' on one side.

Packing: 200 tablets in Alu-Alu blisters of 10 each.

Other information

Storage: Do not store above 30°C

Expiry: The preparation should not be used after the date marked "EXP" on the pack.

Shelf life: 3 years

Keep out of reach of children.
