

HUXLEY'S
WINTOGENO

- MUSCULAR PAIN & STIFFNESS
- BACKACHE
- MUSCULAR ACHES
- PAINFUL BRUISES
- SPRAINS AND STRAINS

White to off-white cream.

Menthol is an essential oil which, when applied to the skin, dilates the blood vessels, causing a sensation of coldness followed by an analgesic effect. Methyl salicylate is a topical analgesic used for the relief of pain in rheumatic conditions. After absorption, menthol is excreted in the urine and bile as glucuronide. Methyl salicylate is absorbed through the skin.

- The affected area should be bathed in hot water prior to the application of Wintogeno.
- A small amount of the Wintogeno cream should be massaged into the skin with the palm of the hand until the area is almost dry, using further amounts as necessary.
- The area should then preferably be covered with a piece of warm dry flannel.
- Wintogeno may be applied 2-3 times daily.

- For external use on unbroken skin only.
- If skin sensitivity reactions occur, discontinue use.
- Vigorous rubbing is not desirable.
- Do not use on the face.
- Avoid contact with the eye and mucous membranes.
- Do not use under occlusive dressings of heating pads.
- Do not use during pregnancy or when breastfeeding.
- This product contains methyl salicylate which, when applied or rubbed onto the skin, can be absorbed into the blood stream. For patients taking warfarin, excessive application may increase the chances of bleeding.

Known hypersensitivity to Salicylates of Menthol; broken or inflamed skin; use under occlusive dressings or heating pads. Do not use for children under 12 years of age.

Store below 30°C.

Keep out of the reach of children.
Jauhi dari kanak-kanak.

WINTOGENO Cream is available in aluminium tubes of 45 g.

Methyl salicylate Ph. Eur. 12.20%w/w
