

W PAIN RELIEF OIL

Product Description: W Pain Relief Oil is yellowish brown liquid with mint aroma

Composition: Methyl Salicylate 30% v/v

Menthol 3.50% w/v

Camphor 6.50% w/v

Eucalyptus Oil 1% v/v

Indication: For temporary relief of minor aches and pain of muscles and joints associated with simple backache, sprains, sciatica and lumbago.

Recommended Dosage: Apply small amount of oil onto the palm 2 to 3 times a day or when needed. Rub in a circular motion on the affected area for 2-3 minutes until the hot sensation is felt.

Route of Administration: Topical

Contraindications:

- 1) Do not use in patients with aspirin or salicylate idiosyncrasy.
- 2) Hypersensitivity to any of the ingredients in the product.
- 3) Contraindicated in infants below 2 years of age.

Warnings:

- Solution contains alcohol. Easily inflammable.
- Wash hands thoroughly after use in order prevent any chance of irritation to the eye and sensitive areas.
- For external use only
- Keep medicine out of reach of children / Jauhkan dari kanak-kanak

CAN CAUSE CONVULSION. CONTRAINDICATED IN CHILDREN BELOW 2 YEARS OF AGE. CAUTION MUST BE EXERCISED WHEN OLDER CHILDREN ARE TREATED. AVOID DIRECT APPLICATION INTO NOSTRILS.

Precautions:

- It is dangerous to place any camphor-containing product into the nostril of children. A small amount applied this way may cause immediate collapse.
- Avoid contact with the eyes.
- Do not apply to wounds or damaged skin.
- This product contains methyl salicylate and when applied or rub on to the skin, can be absorbed through the skin into the blood. For patients taking warfarin, excessive application on to the skin for muscle or joint pains may increase the chances of bleeding.

Interactions with Other Medicaments: This product contains methyl salicylate and when applied or rubbed on to the skin, can be absorbed through the skin into the blood. For patients taking warfarin, excessive application on to the skin for muscle or joints pains may increase the chances of bleeding.

Side Effects: Skin irritation, redness or swelling, burning or stinging sensation. Adverse reaction is rare, symptom of dizziness nausea may occur.

Symptoms and Treatment of Overdose: Symptoms of methyl salicylate overdose: Salicylate intoxication can occur after ingestion or topical application of methyl salicylate. Mild chronic salicylate intoxication, or salicylism, usually occurs only after repeated use of large doses. Salicylism can also occur following excessive topical application of salicylates. Symptoms include dizziness, tinnitus, deafness, sweating, nausea and vomiting, headache, and confusion,

and may be controlled by reducing the dosage. Symptoms of more severe intoxication or of acute poisoning following overdose include hyperventilation, fever, restlessness, ketosis, and respiratory alkalosis and metabolic acidosis. Depression of the CNS may lead to coma; cardiovascular collapse and respiratory failure may also occur.

Symptoms of camphor/menthol overdose: Ingestion of significant quantities is reported to cause symptom: severe abdominal pain, nausea, vomiting, vertigo, ataxia, drowsiness, and coma; instant collapse in infants after the local application of menthol/camphor to their nostrils. Seizures may be the first clinical sign of severe toxicity of camphor; however, seizures are usually self-limited. Severe toxicity of camphor can result in delirium, visual hallucinations, cerebral edema, and status epilepticus. Systemic toxicity may include hypotension, tachycardia, respiratory failure, and death.

Treatment

The stomach should be emptied by gastric lavage or administration of oral activated charcoal. Fluid and electrolyte management is the mainstay of treatment with the immediate aim of correction of acidosis, hyperpyrexia, hypokalaemia and dehydration if present. Any convulsions must be controlled first through supportive care including anticonvulsant therapy.

Packaging: 60ml in glass bottle
