

SACCRANTA SACCHAROMYCES BOULARDII 250 mg SACHETS

Saccharomyces boulardii is a yeast, which is a type of fungus.

Product description

Mixture of off white coloured powder and beige coloured powder with characteristic odour and tastes like orange

Indication :

As a Health Supplement

Directions for use (Adult) :

Take one sachet (0.5g) twice a day after meal or as recommended by your doctor or pharmacist.

Consume the sachet contents directly followed by a glass of water.

Route of administration

Oral

Contraindications:

1. Patients having a central venous catheter. Critically ill patients or immunocompromised patients due to a risk of fungaemia

(See Section Warnings & Precautions).

2. Please consult your doctor/pharmacist before using this product.

Do not take this product if you are immunocompromised

(altered/ weakened immune system) or have central venous catheter.

Warnings & Precautions :

Keep out of reach of children/ Jauhi daripada capaian kanak-kanak.

There have been very rare cases of fungaemia reported mostly in patients with central venous catheter, critically ill or immuno-compromised patients,

most often resulting in pyrexia. In most cases, the outcome has been

satisfactory after cessation of treatment by Saccharomyces boulardii,

administration of antifungal treatment and removal of the catheter when

necessary. However, the outcome was fatal in some critically ill patients

(see Section Contraindications & Section Adverse Effects / Undesirable Effects).
